CENSUS OF MERCHANDISING AND SERVICE ESTABLISHMENTS

Retail Merchandise Trade in Quebec, 1941.
(Preliminary Report)

Retail sales in the Province of Quebec totalled more than \$776,000,000 in 1941 according to preliminary compilations for the Census of Merchandising and Service Establishments which formed part of the Decennial Census of that year. There were 37,940 retail stores in the province in the year under review and these had sales of \$776,824,900, an increase of 19.3 per cent over the \$651,138,500 recorded for 1930, the only other year for which complete retail trade statistics are available. Payroll to employees, exclusive of proprietors' earnings, amounted to \$69,370,000 in 1941, while retail inventories at the end of the year were valued at \$132,839,900.

The scope of the Census of Merchandising for 1941 varied slightly from that of 1930, figures for the earlier year including certain minor types of business either excluded altogether from the 1941 Census or else included in a supplementary section of the report rather than in the main tables. On excluding figures for these types, an increase of about 19 per cent is recorded in the number of stores in operation between the two Census periods.

For Census purposes, retail stores are divided into various kind-of-business classifications, these classifications depending partly upon popular designation and partly upon the kind of commodities handled. The individual kind-of-business classifications are then combined into ten major groups.

Comparisons of the figures for individual kind-of-business classifications between the two years are distorted in some instances by changes in definition and methods of classification. They are also affected by changes in the nature of the business transacted by certain stores, changes which may develop gradually or occur suddenly and which may require the transference of the store in question from one kind-of-business classification to another. Some stores transact business on both a wholesale and retail basis and only those stores whose business is transacted chiefly on a retail basis are included in the Retail Section of the Census. Establishments operating chiefly at wholesale are included in the Wholesale Section. Slight changes in the relative proportions of retail and wholesale business transacted by certain firms may have necessitated their transference from one section of the census reports to another. Changes in number of stores and value of sales between the two census periods for individual lines of business, as shown in the accompanying tables, must be interpreted in the light of these factors.

Included in the total figures for 1941 were 16,565 stores classified broadly as belonging to the food group and including such types of outlets as fruit and vegetable markets, grocery stores, meat markets, etc., which deal chiefly, although not exclusively, in food products. These stores had sales of \$228,704,800 in 1941, an increase of 23 per cent over the corresponding figures for 1930. Included in the food group were 6,841 grocery stores with sales of \$83,723,900, up 18 per cent over the business transacted by 6,146 grocery stores in 1930. There was also an increase in business for stores selling both groceries and fresh meats and classified for census purposes as combination stores. There were 1,904 such stores in Quebec in 1941 with sales of \$75,041,800, a gain of 53 per cent over the business transacted by 1,571 combination stores in the earlier census year. Although the number of establishments declined, the business done by straight meat markets increased by 24 per cent from \$19,295,300 in 1930 to \$23,934,400 in 1941. There were 2,961 stores classified as country general stores in Quebec in 1941 and these had sales of \$44,905,200, up 6 per cent from the business transacted by 2,747 country general stores eleven years ago. Country general stores are defined as stores carrying a general line of merchandise and located in places of less than 2,000 population. Food products are usually sold in these stores but if the sale of such products amounted to as much as 80 per cent of the total business, the store is classified as a grocery store rather than a country general store.

Department stores, variety stores and other stores selling a general line of merchandise are classified broadly for census purposes as belonging to the general merchandising group. There were 1,678 such stores in the province in 1941 with annual sales of \$104,917,500, an increase of about 13 per cent over the business done by 1,532 stores of this type in 1930.

There were 2,738 retail establishments engaged in some phase of the automotive trade and assigned to the automotive group of establishments. These firms had sales of \$103,762,200 in 1941, up 45 per cent over the business transacted by 2,249 establishments in 1930. Sales of motor vehicle dealers increased 37 per cent between the two Census periods; garage receipts were down 30 per cent while the gain for filling stations was outstanding at 185 per cent. There were 1,688 filling stations in Quebec in 1941, with sales of \$29,004,100, while in 1930 there were only 780 filling stations with sales of \$10,158,700. The garages included in this report are those establishments combining repairs with the sale of gas, oil, accessories and equipment, but where receipts from repairs and other services amounted to less than one-half the total business. When revenue was reported as being derived chiefly from repairs, the establishment was assigned to the service section of the census rather than the merchandising.

The apparel group of stores included 3,888 establishments with sales of \$79,793,700, up 31 per cent over the business done by 3,103 stores in 1930. Sales for stores specializing in men's wear increased by 7 per cent. Family clothing store sales gained 66 per cent while sales for stores specializing in women's wear were up 37 per cent. Included also in the apparel group were 498 shoe stores with sales of \$12,207,100, up 16 per cent over the business transacted by 468 shoe stores in 1930.

There were 994 establishments assigned to the building materials group with \$29,204,000 sales in 1941, a reduction of 5 per cent from the volume of business recorded for this group in the 1930 census. Included in these figures were 546 hardware stores with sales of \$15,075,700 in 1941 compared with 500 stores and \$14,159,900 sales in 1930. There were also 126 establishments classified as retail lumber and building material dealers in 1941 and these had sales of \$9,508,900. These figures relate only to retail places of business where manufacturing activities are not carried on. They do not include saw mills, planing mills, or other establishments combining the sale of lumber and building materials with manufacturing operations. Such establishments are included in the Census of Industry rather than in the Census of Merchandising and Service Establishments.

Firms dealing chiefly in furniture and household appliances, musical instruments or other household requirements numbered 894 in 1941 with sales of \$33,023,400, up 13 per cent over the business transacted by 775 such stores in 1930. Included in the totals for 1941 were 393 furniture stores with sales of \$19,719,800 compared with 290 furniture stores and \$12,909,000 sales in the Census of 1930. On the other hand, the volume of business for stores classified as household appliances or radio dealers declined between the two census periods, a result which is probably due to the transference of some stores assigned to this category in 1930 to the furniture group in 1941.

A pronounced increase in sales was recorded in the restaurant group of establishments. There were 1,662 restaurants of various types in Quebec in 1941 with sales of \$25,992,200, up 51 per cent from the business transacted by 925 restaurants in 1930. Other important lines of business for which figures are shown in the accompanying tables include drug stores, of which there were 717 in 1941, with sales of \$17,474,600, a gain of 18 per cent over the business transacted by 658 drug stores in the earlier census. Jewellery store sales increased 30 per cent from 419 stores and \$7,023,100 sales in 1930 to 512 stores and \$9,146,700 sales in 1941. There were 110 government liquor stores in the province in 1941, with sales of \$24,573,700, a decline of 8 per cent from sales of \$26,563,000 by the same number of stores in 1930.

Chain Stores

There were 1,429 units of chain store companies operating in the province of Quebec in 1941 and these had sales of \$132,217,900 or 17.0 per cent of the total business of all stores including both chains and independents. In 1930 there were 1,698 chain store units with \$120,221,700 sales or 18.5 per cent of the total retail business for that year. For census purposes, the chain figures include all firms having four or more retail outlets with the exception of department stores and mail-order houses. All department stores and mail-order houses or offices are classified for census purposes as independents irrespective of the number of units operated by any one firm. The chain figures relate to corporate chains only. Voluntary chains in which the individual firms are independently owned but are grouped for buying or advertising purposes are classified as independents rather than as chains. Government liquor stores are classified as chains when more than four stores are operated by any one provincial government.

The position occupied by retail chains in the food retailing field declined considerably in 1941 from 1930. In the year under review, there were 213 units of chain grocery or combination stores and these had sales of \$28,360,100 or 17.9 per cent of the total sales of all grocery or combination stores. In 1930 there were 495 units of grocery or combination store chains and these had sales of \$24,671,000 or 20.6 per cent of the total.

Scope of Report

This report is one of a series presenting results of the Census of Merchandising and Service Establishments, 1941. This census was taken by mail, the mailing list for the purpose having been prepared by the Population Census enumerators who were instructed to list the names and addresses of all business firms in their respective enumeration areas in June, 1941. Specially prepared schedules were mailed early in 1942 to all firms thus listed on which to report their business operations for the calendar year 1941 or the fiscal year conforming most closely with that period.

This report covers only the salient features of retail merchandising establishments and shows the number of stores, value of sales, annual payroll and year-end inventory for stores classified by kind of business. Figures are shown in detail for the province as a whole and for the cities of Montreal, Quebec, Hull, Sherbrooke, Verdun and Three Rivers. Figures in lesser detail are shown for each county and for each incorporated place of 1,000 population or over. The operations of these types of service establishments coming within the scope of the census will be shown in a later report. A report on the wholesale trade will also be published. More detailed reports covering other phases of the retail trade are in the course of preparation.

Supplementary Reports

The results summarized in the preceding sections relate to regular established retail places of business. In addition, reports were received from a large number of persons who either had no established place of business or else did not devote their full time to retail trading. Reports were received from 3,500 such persons and these reported total annual sales of \$5,908,400 in 1941. Itinerant operators dealing in medicinal preparations, agents for women's made-to-measure garments and farm implement agents having no established places of business form the most common types included in these supplementary figures.

RECENSEMENT DES ÉTABLISSEMENTS DE COMMERCE ET DE SERVICE

Commerce de détail dans le Québec, 1941
(Rapport préliminaire)

D'après des compilations préliminaires du Recensement des Établissements de Commerce et de Service lequel recensement fait partie du Recensement décennal de 1941, les ventes au détail dans la province de Québec en 1941 s'établissent au total à plus de \$776,000,000. Il y a dans la province, l'année d'observation, 37,940 magasins de détail dont les ventes globales sont de \$776,824,900, augmentation de 19.3 pour cent sur le total de \$651,138,500 enregistré en 1930, seule autre année dont il existe des statistiques complètes sur le commerce de détail. Le bordereau de paye, qui ne contient pas le gain des propriétaires, s'élève à \$69,370,000 en 1941 tandis que les stocks de marchandises au détail à la fin de l'année sont évalués à \$132,839,900.

L'étendue du recensement du commerce de 1941 varie très peu en comparaison de 1930, les chiffres de cette dernière année comprenant certains genres d'affaires d'importance secondaire ayant été exclus totalement du recensement de 1941 ou incorporés à une section supplémentaire du rapport plutôt qu'aux tableaux principaux. Abstraction faite de ces chiffres, la même augmentation d'environ 19 pourcent dans le nombre de magasins est enregistrée entre les deux périodes de recensement.

Pour les fins du recensement, les magasins de détail ont été classifiés diversement selon le genre d'affaires, ces classifications reposant en partie sur la désignation populaire et en partie sur le genre de marchandises vendues. Les classifications particulières selon le genre de commerce sont ensuite réunies en dix groupes majeurs.

En raison des changements apportés aux définitions et aux méthodes de classification, les comparaisons entre les chiffres des classifications particulières selon le genre de commerce sont déformées dans certains cas. Elles se ressentent également des changements dans la nature du commerce de certains magasins, lesquels changements peuvent se produire graduellement ou soudainement et exiger le transfert du magasin en question d'une classification selon le genre d'affaires à une autre. Certains magasins font aussi bien le commerce de gros et le commerce de détail et seuls les magasins faisant principalement le commerce de détail figurent à la section du commerce de détail du recensement. Les établissements faisant principalement le commerce de gros sont étudiés dans la section du commerce de gros. De légers changements dans les proportions relatives de commerce de détail et de commerce de gros de certaines maisons peuvent avoir nécessité le transfert de celles-ci d'une section à l'autre. Les changements dans le nombre de magasins et dans la valeur des ventes entre les deux périodes de recensement pour les genres particuliers de commerce, tels qu'indiqués dans les tableaux de ce rapport, doivent être interprétés à la lumière de ces facteurs.

Les totaux de 1941 contiennent 16,565 magasins classifiés largement comme appartenant au groupe des aliments et comprenant des établissements tels que des magasins de fruits et de légumes, des épiceries, des boucheries, etc., qui font principalement, bien que non exclusivement, le commerce des produits alimentaires. Les ventes de ces magasins s'élèvent à \$228,704,800 en 1941, augmentation de 23 pour cent sur les chiffres correspondants de 1930. Dans le groupe de l'alimentation il y a 6,841 épiceries dont les ventes s'établissent à \$83,723,900 soit une augmentation de 18 pour cent sur les chiffres des 6,146 épiceries de 1930. Le commerce augmente aussi des magasins faisant à la fois le commerce des épiceries et des viandes fraîches et qui, pour les fins du recensement, sont classifiés comme des magasins combinés. Il y a 1,904 magasins de ce genre dans la province de Québec en 1941 et leurs ventes s'établissent à \$75,041,800, augmentation de 53 pour cent sur le chiffre d'affaires des 1,571 magasins combinés en 1930. Bien que le nombre d'établissements ait diminué, les affaires des marchés de viandes seules augmentent de 24 pour cent passant de \$19,293,300 en 1930 à \$23,934,400 en 1941. Il y a dans la province de Québec en 1941, 2,961 magasins classifiés comme magasins généraux de campagne. Leurs ventes sont de \$44,905,200, augmentation de 6 pour cent sur le chiffre d'affaires des 2,747 magasins du même genre il y a onze ans. Les magasins généraux de campagne sont définis comme des magasins faisant le commerce des marchandises générales et qui sont situés dans les endroits de moins de 2,000 habitants. Ils font habituellement le commerce des produits alimentaires, mais si les ventes de tels produits s'élèvent à 80 pour cent de leurs affaires globales, ils sont classifiés comme des épiceries plutôt que comme des magasins généraux de campagne.

Les magasins à rayons, les magasins de nouveautés et les autres magasins faisant le commerce des marchandises générales sont classifiés au sens large, pour les fins du recensement, comme faisant partie du groupe des marchandises générales. Il y a 1,678 de ces magasins dans la province en 1941 et leurs ventes s'élèvent à \$104,917,500, augmentation de 43 pour cent environ sur le chiffre d'affaires des 1,532 magasins du même genre en 1930.

Il y a 2,738 établissements de service engagés dans divers genres de commerce se rapportant à l'automobile. Ils font partie du groupe de l'automobile. Leurs ventes s'élèvent à \$103,762,200 en 1941, ce qui constitue une augmentation de 45 pour cent sur les affaires des 2,249 établissements de ce genre en 1930. Les ventes des marchands de véhicules-moteur augmentent de 37 pour cent entre les deux périodes de recensement; les recettes des garages baissent de 30 pour cent tandis que les postes d'essence enregistrent un gain de 185 pour cent. Il y a 1,683 postes d'essence dans la province de Québec en 1941 dont les ventes s'établissent à \$29,004,100 comparativement à 780 seulement en 1930 avec des ventes de \$10,158,700. Les garages figurant à ce rapport sont des établissements faisant des réparations en même temps que la vente de la gasoline, de l'huile, des accessoires et de l'outillage, mais leurs recettes provenant des réparations et autres services s'élèvent à moins de la moitié de leurs affaires globales. Lorsque le revenu est déclaré comme provenant principalement des réparations, ces établissements sont classifiés dans la section des services plutôt que dans celle du commerce des marchandises.

Le groupe des magasins de vêtements comprend 3,888 établissements dont les ventes sont de \$79,793,700, augmentation de 31 pour cent sur le chiffre d'affaires des 3,103 magasins de ce genre en 1930. Les ventes des magasins spécialisés dans les vêtements pour hommes augmentent de 7 pour cent. Celles des magasins de vêtements pour toute la famille augmentent de 66 pour cent tandis que celles des magasins de vêtement pour femmes augmentent de 37 pour cent. Ce groupe comprend aussi 498 magasins de chaussures dont les ventes s'établissent à \$12,207,100, augmentation de 16 pour cent sur les affaires des 468 magasins de chaussures de 1930.

Il y a 994 établissements faisant le commerce des matériaux de construction. Leurs ventes sont de \$29,204,000 en 1941, diminution de 5 pour cent sur celles du même groupe en 1930. Ces chiffres comprennent 546 quincailleries dont les ventes s'élèvent à \$15,075,700 en 1941 comparativement à 500 magasins du même genre en 1930 avec des ventes de \$14,159,900. Il y a aussi 126 établissements classifiés comme magasins de bois et de matériaux de construction au détail. Leurs ventes en 1941 sont de \$9,508,900. Ces chiffres ne portent que sur les locaux où se font les affaires au détail et non sur les manufactures. Ils ne comprennent pas les scieries, les ateliers de rabotage et les autres établissements combinant la vente du bois et des matériaux de construction et les opérations manufacturières. Ces établissements figurent au recensement des industries plutôt qu'au recensement des établissements de commerce et de service.

Les maisons faisant principalement le commerce des meubles et des accessoires ménagers, des instruments de musique ou autres fournitures ménagères sont au nombre de 894 en 1941. Leurs ventes sont de \$33,023,400, augmentation de 13 pour cent sur les affaires des 775 magasins de ce genre en 1930. Les totaux de 1941 comprennent les chiffres de 393 magasins de meubles dont les ventes s'établissent à \$19,719,800 en regard de 290 magasins du même genre en 1930 avec ventes de \$12,909,000. D'autre part, le chiffre d'affaires des magasins classifiés comme faisant le commerce des accessoires ménagers ou de radios décline entre les deux périodes de recensement, ce qui est probablement attribuable au transfert de certains magasins de cette catégorie en 1930 au groupe des magasins de meubles en 1941.

Le groupe des restaurants accuse une augmentation marquée. Il y a en 1941 dans la province de Québec, 1,662 restaurants de genres divers. Leurs ventes s'élèvent à \$25,992,200, soit 51 pour cent de plus que celles des 925 restaurants de 1930. Les autres genres importants de commerce dont les chiffres sont donnés dans les tableaux de ce rapport comprennent les pharmacies, au nombre de 717 et dont les ventes en 1941 s'élèvent à \$17,474,600, augmentation de 18 pour cent sur le chiffre d'affaires des 658 pharmacies de 1930. Les ventes des magasins de bijouterie augmentent de 30 pour cent. Il y a 512 de ces magasins en 1941, avec des ventes de \$9,146,700 en regard de 419 en 1930 avec des ventes de \$7,023,100. Il y a dans la province en 1941, 110 magasins de liqueurs du Gouvernement. Leurs ventes s'établissent à \$24,573,700, déclin de 8 pour cent sur celles de \$26,563,000 dans le même nombre de magasins en 1930.

Magasins en chaîne

Il y a dans la province de Québec en 1941, 1,429 unités de magasins en chaîne. Leurs ventes sont de \$132,217,900 ou 17.0 pour cent des affaires globales de tous les magasins en chaîne et indépendants. En 1930, il y avait 1,698 magasins en chaîne dont les affaires s'élevaient à \$120,221,700 ou 18.5 pour cent de tout le commerce de détail pour l'année. Pour les fins du recensement, les chiffres des magasins en chaîne embrassent tous les établissements ayant quatre succursales de détail ou plus à l'exception des magasins à rayons et des comptoirs postaux. Tous les magasins à rayons et les comptoirs ou bureaux postaux sont classifiés, pour les fins du recensement, comme des établissements indépendants sans tenir compte du nombre de leurs succursales. Les chiffres des magasins en chaîne n'ont trait qu'aux chaînes constituées en corporation. Les chaînes volontaires dont les succursales sont indépendantes mais réunies pour fins d'achat ou de publicité sont classifiées comme des établissements indépendants plutôt que comme des chaînes. Les magasins des liqueurs du Gouvernement sont classifiés comme des magasins en chaîne lorsqu'un Gouvernement provincial en exploite quatre ou plus.

La position occupée par les chaînes de détail dans le commerce des produits alimentaires est beaucoup moins élevée en 1941 qu'en 1930. Il y a au cours de l'année d'observation 213 unités d'épicerie ou de magasins combinés en chaîne et leurs ventes sont de \$28,360,100 ou de 17.9 pour cent des ventes totales de toutes les épicerie ou magasins combinés. En 1930, il y avait 495 unités d'épicerie ou de magasins combinés en chaîne dont les ventes s'établissaient à \$24,671,000 ou 20.6 pour cent du total.

Portée du rapport

Ce rapport fait partie d'une série contenant les résultats du Recensement des Etablissements de Commerce et de Service, 1941. Ce recensement a été fait par correspondance, la liste postale devant servir à cette fin ayant été préparée par les énumérateurs du Recensement de la Population qui avaient reçu instruction de dresser les noms et adresses de tous les établissements de commerce dans leurs arrondissements d'énumération respectifs en juin 1941. Des questionnaires spéciaux furent envoyés de bonne heure en 1942 à toutes les maisons ainsi énumérées qui devaient y répondre en donnant les détails relatifs à leur commerce au cours de l'année civile 1941 ou l'année fiscale se rapprochant le plus de cette période.

Ce rapport n'embrasse que les caractéristiques principales des établissements de commerce de détail. Il donne le nombre de magasins, la valeur des ventes, le bordereau de paye annuel et l'inventaire de fin d'année des magasins classifiés selon le genre d'affaires. Les chiffres sont donnés en détail pour l'ensemble de la province ainsi que pour les villes de Montréal, Québec, Hull, Sherbrooke, Verdun et Trois-Rivières. Des chiffres moins détaillés sont donnés pour chacun des comtés et pour chaque localité de 1,000 habitants ou plus érigée en corporation. Les opérations des genres d'établissements de service tombant sous le recensement seront étudiées dans un autre rapport, et un rapport sur le commerce de gros sera publié. D'autres relevés plus détaillés portant sur d'autres aspects du commerce de détail sont en préparation.

Rapport supplémentaires

Les résultats condensés dans les sections qui précèdent se rapportent aux établissements de détail ordinaires. Des rapports ont été reçus en outre d'un grand nombre de personnes qui n'ont pas d'établissements de détail établis ou qui ne consacrent pas tout leur temps au commerce de détail. Le nombre de ces rapports est de 3,500 indiquant des ventes annuelles de \$5,908,400 en 1941. Les vendeurs itinérants faisant le commerce des préparations médicinales, les agents pour les vêtements faits sur mesure pour femmes et pour les instruments agricoles n'ayant pas de locaux d'affaires établis constituent les genres de commerce les plus fréquents figurant dans ces chiffres supplémentaires.
